

EXTREME Solid State Drive

SONY
EX solutions

PMW-EX camera operators can now record a large amount of data directly to an external solid state drive. Available in two memory capacities, the Hawk-Woods 'Extreme' SSD's connect via a cable to the cameras express card slot. Using a quick-release system, they can be mounted and directly powered from any of the Hawk-Woods range of EX camera adaptors.

Extreme SSD users will be able to take advantage of the large amount of footage that can be recorded, and the high speed at which this footage can now be transferred to a preferred editing device. **300 minutes of footage can be downloaded in just 14 minutes using an e-Sata port.**

Features & Benefits

- PMW-EX Camera Compatible
- 64GB or 128GB Capacity
- Solid State Hard Drive
- Fast 'e-Sata' Download Transfer
