

The **Hawk-Woods** Reel Power 'Film Camera Battery-System' has been designed for compatibility with high speed film cameras. This range of powering solutions offer those working with this equipment, a cost effective, portable solution.

Reel Power Batteries

The RP range of high capacity Li-Ion and Manganese Li-Ion batteries have been specifically designed for running high voltage, high speed film cameras. This includes the widely used Phantom HD series. Reel Power on-board battery packs offer operators a convenient portable alternative. All batteries feature a male V-Mount type fitting which is compatible with the Reel Power range of chargers, adaptors and fittings (capacities overleaf).

Reel Power Chargers

The portable RP battery chargers have been designed to sequentially charge either the 26V or 30V series of RP batteries. Featuring two V-Mount type channels, they will fast charge the Manganese RP-90M or RP-100M in approximately one hour. Two RP-140 or RP-180 batteries can be charged in around four hours each respectively.

RP-CF1 Reel Power Camera Fitting

This Camera Fitting provides film camera operators with Reel Power system compatibility. The V-Mount battery fitting allows high power film cameras to utilise the Reel Power range of high capacity batteries. Power is transferred to the camera via a 3-pin XLR flying lead. Additional power distribution is available via a Power-Con (D-Tap) socket and 3-pin Fischer connector.

RP-CA1X Reel Power Camera Adaptor

The RP Camera Adaptor allows the high capacity Reel Power battery range (26/30V) to be used with conventional 12V broadcast cameras. It will attach to any camera using the Sony 'V-Mount' type battery fitting, creating Reel Power battery compatibility.

RP-XP1 Reel Power Dual Battery Adaptor

The RP-XP1 provides camera operators with complete piece of mind. This 'seamless switch' Dual Adaptor allows two Hawk-Woods' Reel Power Batteries to be connected to a film camera together and then discharged in sequence. As well as providing increased camera run-times, it also provides a convenient battery back-up for the user.

Reel Power Battery Capacities Available

- **RP-100M** 26V 100W Lithium-Ion Manganese Battery
- **RP-180** 26V 180W Lithium-Ion Battery
- **RP-90M** 30V 90W Lithium-Ion Manganese Battery
- **RP-140** 30V 140W Lithium-Ion Battery

Reel Power Battery Chargers Available

- **RP262L** 26V 2-Channel Fast Charger
- **RP302L** 30V 2-Channel Fast Charger
