NP1 Batteries

NP-65 & 70

The lightweight NP-65 & NP-70 will provide 65 & 70Watts of power respectively; they are well suited to modern camcorders able to take advantage of the high output voltage offered by Li-Ion. They're also suitable for today's sound-recorder and can be used directly with the APR-1 & APR-2 power racks.

Features

- 14.4V 4.4Ah/4.8Ah Output
- Li-Ion Cell Technology
- Fuel Gauge
- Ultimate Performance

NP-29

This NP battery is the perfect solution for sound-recordists and will power an SQN mixer for lengthy durations at a time. When powering a mixer and two Audio radio mics, you can expect run times of approximately 6 hours.

Features

- 12V 2.4Ah (30W) Output
- Ni-Cad Cell Technology

NP-1X

This 13.2V NP1 battery is ideal for cameras with a high cutout point (11V) like the Sony betacam. Given it's lower capacity the NP1X would still power a mixer and two radio mics for about 4.5hours.

Features

- Ni-Cad Cell Technology
- 13.2V /1.9Ah (23W)
