

## **Power From The Bloc**

Hawk-Woods popular 'Hot-Bloc' is now available with power input and output options. The Hot-Bloc allows you to maximise the potential of a standard camera hot-shoe fitting, by providing three additional hot-shoe mounts. The two new Hot-Bloc adaptors, the HB-B1 and HB-C1, also feature a battery fitting and power output sockets. This means the operator can mount and power, multiple equipment on a single camera hot-shoe.

The HB-B1 is compatible with Sony NP-F type batteries and the HB-C1 with Sony BPU type batteries. The batteries simply clip to the rear of the adaptors, both Hot-Blocs feature Hirose and D-Tap power output sockets. A DC input also allows equipment attached to these adaptors to be run from an alternative power source.
